IP Locator

State-of-the-Art IP Address Lookup Technology

How much do you know about the geographic location of people who visit your website each day? To increase your e-commerce conversions and capture more Web leads, you need to understand where your customers are located. IP address location data helps your sales and marketing leaders create targeted campaigns and initiatives based on customers' regional dispersions.

Melissa Data's IP Locator uses 20 different techniques to determine the physical location of an IP address. This comprehensive IP data makes it ideal for making the most of your current Web traffic.

| Sample IP Input | Sample IP Output |
|-----------------|--|
| 216.231.3.166 | Lat: 50.7160 Long: 7.0510 State or Region: Nordrhein-Westfalen ISP Name: T-Mobile Deutschland Gmbh City Name: Bonn Country: United States |

Cloud Service - Supports multiple protocols, including: JSON, SOAP, XML, and REST.

What is an IP Address?

An IP (Internet Protocol) Address is a unique set of numbers (for example, 182.778.0.2) assigned to each computer. Like the unique street address assigned to a physical residence or business, the IP address distinguishes one networked computer from another. Melissa Data analyzes the IP Addresses of your Web visitors and appends valuable geographical information to each address.

Benefits & Features:

- Profile Web traffic by geographical location
- Redirect users to specific language/country pages
- Improve business intelligence
- Returns lat/long data, Zip Code™, region, and more
- Updated monthly
- Display regionally-specific products to visitors
